A Woman Owned 8(a) Company

HOSPITALITY INDUSTRY CAPABILITIES STATEMENT

CCSI offers the Hospitality/Casino/Resort Industries certified installers fully versed in all hotel data cabling designs including CAT 5e and CAT 6 structured cabling, coax & fiber optic distribution designs and installations for a wide range of hotel-casino-resort network applications. CCSI can help your property integrate data and telecommunication networks over fiber or the latest network topology available. Our systems engineers and technical support staff have an in-depth knowledge of the telecommunications industry and we work closely with our customers to develop and deliver innovative solutions for the most challenging, business critical requirements.

Structured Cabling Solutions

Cabling Site Surveys

Site surveys isolate numerous variables that you may not be aware of and help minimize surprises during actual installation. Accurate site surveys can help you determine the feasibility of an instillation, budgetary constraints, and whether specialty tools or supplies are required.
Network Wiring Testing

Wiring infrastructure is the foundation for every network. Our services include testing and certification of new or existing copper or fiber networks.

Structured Cabling Installation

CCSI's structured cabling services can plan, design, install, maintain, troubleshoot, and upgrade any size network. From 1 to 1,000 drops CCSI's network of technicians is ready to go to work for you.

Wi-Fi Network Installation

CCSI offers full service wireless network implementation. We can design, plan, and install your network from start to finish. Each wireless solution is custom designed to meet the challenges and needs of your location.

Hotel Solutions
