IT & COMMUNICATIONS CAPABILITIES OVERVIEW

CCSI's Communications Division specializes in designing and managing the implementation of the physical infrastructure and enterprise networks for new construction, tenant improvements and renovations. We provide the highest quality services and deliver the best value solutions to support our clients' success. We are successful in accomplishing our mission due to our deep level of technical expertise, the integrity of our staff, our commitment to a solid work ethic and our passion to serving the public sector.

Services

Cabling Site Surveys

Site surveys isolate numerous variables that you may not be aware of and help minimize surprises during actual installation. Accurate site surveys can help you determine the feasibility of an installation, budgetary constraints, and whether specialty tools or supplies are required.

Network Wiring Testing

Wiring infrastructure is the foundation for every network. Our services include testing and certification of new or existing copper or fiber networks.

Structured Cabling Installation

Structured cabling services plan, design, install, maintain, troubleshoot, and upgrade any size network. From 1 to 1,000 drops CCSI's network of technicians is ready to go to work for you.

Wi-Fi Network Installation

Full service wireless network implementation. Each wireless solution is custom designed to meet the challenges and needs of your location.

Audio/Visual & Video Teleconferencing

Our expertise with networking and audio-visual installations combine to provide first-rate VTC and A/V installation solutions. From installation to set-up we can do it all.

Security Solutions

Design, install and service seamlessly integrated electronic security solutions. Serving single-site customers, as well as those with a multi-site footprint, we can design a solution to meet both current needs and future growth plans.
